

EMERGENCY LED LAMP (P/N 335100.001)

LED lamp is to provide emergency and stand - by illumination in aircraft cabins.

- Solid state reliability
- Energy savings
- Electrical safety
- Work capacity at input voltage 18 – 33 V and protection from high-voltage pulse (up to 600 V)
- Without blinding effect
- Uniform luminosity of radiating surface

TECHNICAL DATA

Light source	50 LED chips
Color	white
Typical color temperature (CCT), °K	4500 – 6000
Input voltage, VDC	27 (18–33)
Nominal power, W	6.5
Case	aluminum alloy
Lens	PC (clear) + holographic diffuser
Weight, kg	0.45

Longitudinal (E_x) and lateral (E_y) distribution of illuminance.
